Sample Test Document

This is a sample PDF document created for testing the AskMyDocs application. The document contains information about various topics including: 1. Artificial Intelligence and Machine Learning 2. Programming languages like Python 3. Web frameworks such as FastAPI 4. Database technologies 5. Cloud computing concepts This document should be processed by the embedding system and made searchable through the query interface. The text extraction and embedding functionality will be tested using this document. Key testing scenarios include: - Document upload and processing - Text extraction from PDF format - Embedding generation for semantic search - Query processing and response generation - Retrieval of relevant document sections The document serves as a comprehensive test case for the entire RAG (Retrieval Augmented Generation) pipeline implemented in the AskMyDocs application.
